

FOR IMMEDIATE RELEASE

Valley Montessori School in Livermore Breaks Ground on Campus Expansion
Livermore, California, January 30, 2010

The Valley Montessori School community was joined by Mayor Marshall Kamena to celebrate and break ground on a new 8500 square foot building to expand their existing campus. This will add six additional classrooms and a half-court gymnasium to the school's current 37,500 square foot campus on North Livermore Avenue.

VMS Head of School, Mary Ellen Kordas explains, "This expansion grew out of a shared vision and unique opportunity to enhance the educational experience for the children. Growing our campus to fit the needs of our families allows us to implement program enhancements such as expanding our physical education program, providing additional space for music, art and science, and offering a greater variety of after school activities." The expansion plan also includes a native garden with footpaths as an outdoor classroom experience.

Valley Montessori is a fully accredited, non-profit school serving families in the east bay for over thirty years. VMS offers an opportunity for children to become independent, confident, competent individuals who will lead our world into the future. With a self-paced, individualized program, VMS students are inspired to realize their academic, personal and social potential. VMS serves over 500 students from toddler through middle school with a challenging, integrated curriculum in multi-aged classrooms, and a supportive, respectful community - providing an education for life.
